

## SUMMARY

Seeking for a challenging career to utilize my skills in order to increase productivity of an Organization. I am interested to work in a challenging environment in which I consolidate my skills and experience that I have acquired so far during the studies & work for enhancing my career

## EDUCATION

### GCUF

Associate Degree in Information Technology  
2020 – 2022

## SKILLS

- Html
- CSS
- Bootstrap
- TailwindCss
- JavaScript
- Laravel
- Vue
- Vuex
- MySql
- Project Management
- Public Relations
- Teamwork
- Time Management
- Leadership
- Effective Communication
- Critical Thinking

## PROFESSIONAL EXPERIENCE

### Web Developer

Xelent Solutions | 2022- Present

- As a web developer at **Xelent Solutions**, I am responsible for creating dynamic and visually appealing web applications using a range of technologies including **HTML, CSS, Bootstrap, TailwindCSS, JavaScript, Laravel, Vue, and Vuex**. My role involves collaborating with cross-functional teams to design, develop, and implement innovative solutions that meet business objectives and enhance user experience. I contribute to the entire development lifecycle, from concept and design to testing and deployment, ensuring the highest standards of quality and performance are maintained throughout the process.

### Projects

#### Pharmacy POS :

- Developed a comprehensive Pharmacy Point of Sale (POS) system. The system includes features such as inventory management, sales tracking, customer management, and receipt generation. Implemented functionalities for real-time stock updates, barcode scanning, and detailed sales reports. Utilized technologies including Laravel for the backend and Vue.js for the frontend, ensuring a responsive and user-friendly interface. The project demonstrates proficiency in full-stack development, database management, and integration of modern web technologies.

#### POS For Resturent :

- Developed an advanced Restaurant Point of Sale (POS) system. This system encompasses features such as table management, order tracking, menu customization, and billing. Implemented functionalities for real-time order updates, kitchen display systems (KDS), and detailed sales analytics. Utilized technologies including Laravel for the backend and Vue.js for the frontend, ensuring a seamless and intuitive user experience. The project highlights expertise in full-stack development, database management, and the integration of modern web technologies for efficient restaurant operations.

**Auction System :**

- Developed a robust Auction System, incorporating features such as user registration, item listings, real-time bidding, and auction management. Implemented functionalities for automatic bid increments, countdown timers, and bid history tracking. Utilized technologies including Laravel for the backend and Vue.js for the frontend, ensuring a responsive and user-friendly interface. The project showcases skills in full-stack development, real-time data processing, and the integration of secure, scalable web technologies to facilitate seamless auction operations.

**Hospital Management:**

- Designed and developed a comprehensive Hospital Management System using Vue.js and Laravel framework.
- Implemented modules for OPD, OT, Inventory, and Lab Management, ensuring seamless integration and functionality.
- Created responsive and user-friendly interfaces to improve usability for hospital staff and administrators.
- Developed custom reports and analytics dashboards to monitor key metrics and improve decision-making processes.
- Collaborated with cross-functional teams including doctors, nurses, and administrators to gather requirements and implement solutions.

**DJ Booking:**

- Developed and maintained a comprehensive DJ booking system using Laravel framework.
- Implemented features for leave management, allowing DJs to request leaves and managers to approve them.
- Designed and optimized matrix bookings for scheduling DJs and technicians, ensuring smooth operations and minimal conflicts.
- Integrated payment gateways and invoicing systems to streamline financial transactions.
- Collaborated closely with artists, technicians, and clients to meet their requirements and ensure successful events.

**Ecommerce Website:**

- Developed and maintained a scalable eCommerce platform using Vue.js for front-end and Laravel for backend development.
- Implemented features such as product catalog, shopping cart, checkout process, and payment gateway integration.
- Optimized performance and user experience through responsive design and efficient data management.
- Conducted code reviews and mentored junior developers to ensure coding standards and best practices.

**Land Sale Purchase Website:**

- Designed and developed a land sale and purchase system using Vuex, Vue.js for the front-end, and Laravel for backend development.
- Implemented features for property listings, search functionality, user authentication, and payment integration.
- Ensured data security and privacy compliance by implementing robust authentication and authorization mechanisms.
- Optimized performance and user experience through responsive design and efficient data fetching techniques.

**Vehicle Reservation:**

- Led the development of a vehicle reservation system using Vue.js and Laravel, enabling users to book vehicles online.
- Implemented features for vehicle availability, booking calendars, pricing, and user authentication.
- Integrated third-party APIs for vehicle tracking and payment processing, ensuring seamless operations.
- Collaborated with cross-functional teams including UX/UI designers and QA engineers to deliver a user-friendly and reliable system.

**University Attendance System**

- Developed and implemented a University Attendance System using Vue.js for the front-end and Laravel for backend development.
- Integrated Face API for biometric authentication and facial recognition to track student attendance accurately.
- Implemented features for real-time attendance monitoring, reporting, and analytics.
- Ensured data security and privacy compliance by implementing robust authentication and encryption mechanisms.
- Optimized performance and user experience through responsive design and efficient data fetching techniques.
